

SUSHANS LONDHE

Full Stack developer

☎ +91 7758824545 ✉ sushanslondhe.dev@gmail.com [in LinkedIn](#) [Github](#) [Portfolio](#)

Education

Savitribai Phule Pune University

2020 – 2024

Bachelor of Engineering (BE)

Overall CGPA: 7.00 (First Class)

Summary

Worked as full Stack Developer intern in early startup. Solved more than 110 problems on [Leetcode](#) and attended contests. Proficient in JavaScript, TypeScript, Java, Python, React.js, Redux toolkit, Next.js, Express.js, worked with NoSQL and SQL databses like MongoDB, PostgreSQL, Redis, Git, Docker, and Kubernetes.

Skills

Languages: JavaScript, TypeScript, Java, Python
Frameworks/Libraries Flask, React.js, Redux Toolkit, Next.js, Express.js, Hono.js
Cloud Serverless: Clouflare Workers
Web Technologies: WebRTC
Databases: MongoDB, PostgreSQL, Redis
Developer Tools: Git, Postman, Docker, Kubernetes

Work Experience

Kamjritztex It Solutions

Pune, Maharashtra

Jr Software Developer

December - Current

- Developed and maintained responsive user interfaces with React.js, focusing on creating reusable components and optimizing performance for a seamless user experience. Improved page load time by 30 percentage
- Adaptable and quick to learn new technologies, contributing to the successful delivery of various products with varying technical requirements.
- Implemented RESTful APIs for seamless data communications, Optimized REST API calls to reduce load times resulting in a 15 perc. increase in page speed
- Led the effort to enhance backend security by implementing rate limiting, secure password hashing, and SQL injection prevention techniques, resulting in a significant improvement in the application's overall security posture.

Kampkode

Pune, Maharashtra

Fullstack developer intern

July - September 2024

- Initiated as a frontend developer and played a key role in building a website from scratch, demonstrating strong proficiency in Mern stack
- Expanded responsibilities to include backend development after demonstrating exceptional performance, effectively transitioning into a full-stack role

Projects

Real Time Crypto-Exchange Platform

Github

- Developed a high-performance, server-rendered crypto exchange platform using Next.js, a popular React framework.
- On the backend, I crafted a secure infrastructure using Node.js with TypeScript for type-safe server-side development.
- Integrated WebSockets to establish real-time data connections with a live crypto data API, enabling the platform to display up-to-the-minute prices, order book information, and other critical financial data.

Learning management System | TypeScript, Next.js, Express.js, PostgreSQL, Prisma

Github

- Developed full stack learning management system with next.js, express.js and PostgreSQL for database
- Created RESTful APIs using Express.js for robust server-side functionality. Developed authentication and authorization mechanisms to ensure secure user access.
- Implemented CRUD operations for core LMS functionalities such as User registration and profile management, Course creation and management.

Digital-Wallet | TypeScript, Next.js, PostgreSQL, Prisma, NextAuth.js, Docker

Github

- On the backend, I crafted a secure infrastructure using Node.js with TypeScript for type-safe server-side development.
- Transitioning to the frontend, I adeptly utilized TypeScript, Next.js for robust, server-side rendered React applications for seamless user experience.
- I used PostgreSQL for reliable data storage, coupled with Prisma ORM for efficient database operations, NextAuth.js for secure, customizable authentication flows

Certifications

- MERN Full Stack Developer
- Software Engineering Job Simulation - Goldman Sachs
